

CY50

TAP POSITIONS CONTROLLER

◎ Product Introduction

CY50 tap position controller is used for remote control of tap changer and monitoring of tap position. It is mainly used with ZD electric mechanism, and its main function is to realize the communication between this controller and local ZD electric mechanism through communication cable.

◎ Main functions

1. Tap position display
2. 1→N, N→1, stop command operation
3. Output passive BCD code
4. Remote control 1→N, N→1, stop command input port

◎ Technical Data

1. Power supply: AC220V± 20%, 50Hz; DC220V± 10%
2. Connection with electric mechanism: RS485 communication port (transmission protocol adopts MODBUS protocol)

◎ Installation size and method
